

# INTERIM REPORT CRIMINAL INVESTIGATION AND ADJUDICATION COMMITTEE

JULY 2016

[WWW.NCCALJ.ORG](http://WWW.NCCALJ.ORG)

## PREFACE

These interim reports outline the work-to-date of the North Carolina Commission on the Administration of Law and Justice (NCCALJ). Chief Justice Mark Martin convened the independent, multidisciplinary commission in September of 2015, and charged the members to evaluate the North Carolina judicial system and provide findings and recommendations for strengthening our courts within the existing administrative framework.

Sixty-five voting members and additional non-voting guests were asked to serve, drawn statewide from business, academia, the bar, the non-profit sector, the Legislature, and the Judicial Branch, to ensure a well-rounded evaluation of the judicial system. Each of the members serves on one of five NCCALJ committees studying the areas of civil justice, criminal investigation and adjudication, legal professionalism, public trust and confidence, and technology. Over the past 10 months, these committees have held forty meetings where members heard presentations from more than ninety different national and statewide experts, practitioners, and court officials, resulting in productive and focused dialogue.

### **The NCCALJ Wants to Hear From You**

The NCCALJ recognizes the vital importance of public participation in the process of court system improvement. The interim reports that follow are intended to inform the public of the relevant issues the committees are addressing and to invite input and feedback. Submit comments online at [www.nccalj.org/interim-reports](http://www.nccalj.org/interim-reports) or sign up to speak in person at one of the four public hearings scheduled for August 2016. The dates, locations, and sign-up forms for those meetings are also at the commission's website.

In the fall of 2016, the NCCALJ's five committees will incorporate the public feedback into final recommendations to be presented to the Chief Justice, the Legislature, and the public in early 2017.

The NCCALJ thanks you for your feedback on how North Carolina courts can best meet institutional needs and 21st century public expectations. We look forward to hearing from you.

*The Criminal Investigation & Adjudication Committee (“the Committee”) is focusing on four issues: (I) Juvenile Age; (II) Indigent Defense; (III) Pretrial Release; and (IV) Criminal Case Management. This report provides an update on the Committee’s work on these issues. The Committee welcomes input from all interested persons and organizations.*

## I. JUVENILE AGE

The Committee’s work on this issue is summarized in its draft report, attached as Appendix A. Because the Committee has actively engaged all stakeholders in its work on this issue and has strived to address all validated stakeholder concerns, the draft report is presented with the ultimate hoped-for result of unanimous stakeholder support.

## II. INDIGENT DEFENSE

As the United States Supreme Court recently declared: “No one doubts the fundamental character of a criminal defendant’s Sixth Amendment right to the Assistance of Counsel.” This right is so critical that the high Court has deemed its wrongful deprivation to constitute “structural” error, affecting the very “framework within which the trial proceeds.” For indigent defendants, this fundamental right to effective assistance of counsel must be provided at state expense. When the system fails to provide this right, it denies indigent defendants justice. That denial can have very real consequences for defendants, including excessive pretrial detention, increased pressure on innocent persons to plead guilty, wrongful convictions, and excessive sentences.

There are, however, other costs associated with the State’s failure to provide effective assistance, including costs to victims, families, communities, taxpayers and the criminal justice system as a whole. Costs to the criminal justice system include trial delays and an increased number of appeals and post-conviction challenges, all of which must be funded by North Carolina taxpayers, as are costly retrials when those challenges are successful. As has been noted: “Justice works best when all players within the system are competent and have access to adequate resources. When the system includes well-trained public defenders, cases move faster ... and the system tends to generate and implement innovative programs.” Trial delay is not merely a theoretical danger; it is an actual one. District Attorneys forcefully asserted to the Committee that an erosion of the quality of North Carolina’s indigent defense bar was impairing their ability to deliver justice in the state’s criminal courts.

In comments to the Committee, Justice Rhoda Billings emphasized that wrongful convictions deny justice to victims and put North Carolina’s citizens in danger by allowing the real criminals to remain at large, free to perpetrate crime on others. Additionally, families of wrongfully convicted defendants suffer, not just from the loss of a family member who may be incarcerated, but from the dramatic collateral consequences that follow as a result of any criminal conviction, including barriers to obtaining employment, joining the military, or receiving financial aid to pursue higher education. These collateral consequences impair the person’s ability to support both himself and his family, often necessitating public assistance and thus additional taxpayer support.

In addition to paying for the cost of an inefficient justice system, taxpayers pick up the tab for ineffective assistance in other ways. When inadequate lawyering results in excessive pretrial detentions and sentences and in incarceration for convictions that are later reversed, the costs of such detentions are paid by North Carolina's citizens. Also, the cost of civil suits and large case settlements leave taxpayers with the bill for wrongful convictions.

Finally — and importantly — another cost of failing to provide an effective indigent defense system is a loss of public confidence in the court system's ability to administer justice. Inadequate indigent defense services compromise the integrity of the justice system by calling its fairness into question. Because people in the lowest income groups are most likely to require indigent defense services, failures in the indigent defense system are felt most acutely by these individuals. As Justice Billings noted to the Committee: Americans strongly believe that the amount of money a person has should not affect the amount of justice he or she receives; any perception of fairness vanishes if our citizens believe that a poor person is placed at a significant disadvantage in the justice system. In fact, evidence indicates that a majority of citizens *already* believe that poor people are at such a disadvantage: A recent survey of North Carolinians shows that 64% of respondents believe that low-income people fare worse than others in our state court system.

Sixteen years ago the North Carolina General Assembly created the state's existing indigent defense system. While stakeholders agree that North Carolina has benefited greatly from the creation of the Office of Indigent Defense Services and the Commission on Indigent Defense Services, the potential that both hold for providing uniform quality, cost-effective representation statewide has yet to be fully achieved.

The Committee is developing recommendations designed to help North Carolina strengthen the protections it offers to indigent people when their liberty is at stake. It is approaching this issue in a two-step process. First, defining the critical characteristics of an effective indigent defense system. And second, making recommendations regarding how to best achieve those characteristics in North Carolina. Recommendations currently under consideration include:

- Establishing single-district and regional public defender offices throughout the state.
- Providing oversight, supervision and support to all counsel providing indigent defense services.
- Implementing uniform indigency standards.
- Implementing uniform qualification and performance standards and workload formulas for all counsel providing indigent services.
- Providing reasonable compensation for all counsel providing indigent defense services.
- Developing a long-term plan for the delivery of indigent defense services in the state.
- Reducing the cost of indigent defense services to make resources available for needed reforms

### III. PRETRIAL RELEASE

The Committee is examining pretrial release for several reasons. One is a concern that North Carolina may be routinely detaining individuals who present little or no pretrial release risk simply because of their inability to pay a money bond. Another concern is that wealthy but very dangerous defendants can simply buy their way out of detention, presenting an unacceptable risk to community safety. Other concerns revolve around the lack of evidence-based practices with respect to pretrial risk assessment and the opportunity for racial or other biases to improperly influence pretrial release decisions.

To begin to address these and other issues, the Committee is undertaking a jail study. Although statewide data exists with respect to jail populations and maximum jail capacities, no statewide data currently exists with respect to North Carolina's pretrial detainees. The Committee's study is examining the number of pretrial detainees in local jails, their race, their offense type, the number detained on secured bond, the average secured bond by offense type, and the average days of pretrial detention. Additionally, through the National Center for State Courts, the Commission has retained an expert to prepare a report providing:

- Recommendations regarding how North Carolina can improve the way it measures pretrial risk. The Committee has noted that it is interested in any evidence-based recommendations in this respect. It further noted that it is particularly interested in exploring whether or not North Carolina should use a validated, evidence-based pretrial risk assessment tool that can be implemented by the magistrate, typically the first decision-maker in the pretrial release process. If the evidence suggests that such a tool would be beneficial, the Committee has asked that the report recommend a specific tool and identify the most effective implementation method (e.g. statutory, court rule, etc.). The Committee has further asked that the report identify existing statutes, court rules, local procedures, etc. that will need to be modified or repealed to implement the recommendations regarding assessing pretrial risk.
- Recommendations regarding how North Carolina can improve the way it manages pretrial risk. The Committee specified that although the report need not be limited to these issues, it is particularly interested in:
  - Whether or not North Carolina should adopt a procedure allowing for the preventative detention of defendants for whom pretrial release is inappropriate. If so, what the procedure should look like.
  - A statement of general principles with respect to release of persons other than those preventatively detained and recommendations regarding statutory language to that effect.
  - Whether or not North Carolina should provide clearer guidance to judicial officials to help them match appropriate pretrial conditions to an individualized assessment of pretrial risk. If so, how.
  - An evaluation of pretrial release conditions currently being used in North Carolina and identification of effective pretrial release conditions being used in other jurisdictions that should be considered here (e.g., court date reminders).

- Identification of statutes, court rules, local policies, etc., that would need to be adopted, modified or repealed to implement the recommendations.

Additionally, the Committee will receive information from interested stakeholders on the issues under consideration.

## IV. CRIMINAL CASE MANAGEMENT

Concerns about case delays and inefficient case processing have caused the Committee to focus on criminal case management. Through the National Center for State Courts, the Commission has retained an expert to meet with stakeholders and prepare a report for the Committee:

- Identifying indicators suggesting that North Carolina should undertake an effort to improve the management of criminal cases through better caseload management.
- Discussing the potential benefits for addressing criminal caseload management including cost savings, improvements in public trust and confidence, and improved user perception of and satisfaction with fairness of criminal proceedings.
- Reviewing the fundamental principles of criminal caseload management and their application to the North Carolina courts.
- Identifying key components of effective criminal caseload management that could be employed in North Carolina, such as differentiated case management, performance metrics, evaluation, and feedback.
- Setting forth a step-by-step plan to guide a statewide effort to improve criminal case management including major activities, key players, and a plan timeline.

Every North Carolina Study Has Made the Same Recommendation: Raise the Age .....	16
Broad Bi-Partisan & Unanimous Stakeholder Support to Raise the Age.....	16

### Executive Summary

North Carolina stands alone in its treatment of 16- and 17-year-olds (“youthful offenders”) like adults for purposes of the criminal justice system. In 1919, North Carolina determined that juvenile court jurisdiction would extend only to those under 16 years old.<sup>1</sup> A substantial body of evidence suggests that both youthful offenders and society benefit when persons under 18 years old are treated in the juvenile justice system rather than the criminal justice system. In response to this evidence, other states have raised the juvenile age. Notwithstanding recommendations from two legislatively-mandated studies of the issue, positive experiences in other states that have raised the age, and two cost-benefit studies showing that raising the age would benefit the state economically, North Carolina has yet to take action on this issue.

After careful review and with historic support of all stakeholders,<sup>2</sup> the Committee recommends that North Carolina raise the age of juvenile court jurisdiction to include youthful offenders aged 16 and

<sup>1</sup> In 1919, the Juvenile Court Statute was passed, providing statewide juvenile courts with jurisdiction over children under the age of 16. BETTY GENE ALLEY & JOHN THOMAS WILSON, NORTH CAROLINA JUVENILE JUSTICE SYSTEM: A HISTORY, 1868-1993, at 4 (NC AOC 1994) [hereinafter NC JUVENILE JUSTICE: A HISTORY]. The intent of this legislation “was to provide a special children’s court based upon a philosophy of treatment and protection that would be removed from the punitive approach of criminal courts.” *Id.*

<sup>2</sup> See *infra* page \_\_ for a listing of all stakeholders.

17 years old for all crimes except Class A through E felonies and traffic offenses.<sup>3</sup> This recommendation is contingent on:

1. Maintaining the existing procedure in G.S. 7B-2200 to transfer juveniles to adult criminal court,<sup>4</sup> except that Class A-E felony charges against 16- and 17-year olds will be automatically transferred to superior court after a finding of probable cause or by indictment.<sup>5</sup>
2. Amending G.S. 7B-3000(b) to provide that the juvenile court counselor must, upon request, disclose to a sworn North Carolina law enforcement officer information about a juvenile's record and prior law enforcement consultations with a juvenile court counselor about the juvenile, for the limited purpose of assisting the officer in exercising his or her discretion about how to handle an incident being investigated by the officer which could result in the filing of a complaint.<sup>6</sup>
3. Requiring the Division of Juvenile Justice to (a) track all consultations with law enforcement officers about a juvenile<sup>7</sup> and (b) provide more information to complainants and victims about dismissed, closed, and diverted complaints.<sup>8</sup>

---

<sup>3</sup> Ensuring that Class A through E felonies charges against 16- and 17-year olds are tried in superior court is critical to the support of these recommendations by the N.C. Conference of District Attorneys.

Traffic offenses are excluded because of the resources involved with transferring the large volume of such crimes to juvenile court. This recommendation parallels those made by others who have examined the issue. See NORTH CAROLINA SENTENCING AND POLICY ADVISORY COMMISSION, REPORT ON STUDY OF YOUTHFUL OFFENDERS PURSUANT TO SESSION LAW 2006-248, SECTIONS 34.1 AND 34.2 (2007) (excluding traffic offenses from its recommendation to raise the age) [hereinafter 2007 SENTENCING COMMISSION REPORT]; YOUTH ACCOUNTABILITY PLANNING TASK FORCE, FINAL REPORT TO THE GENERAL ASSEMBLY OF NORTH CAROLINA (Jan., 2011) (same) [hereinafter YOUTH ACCOUNTABILITY TASK FORCE REPORT]. Consistent with prior recommendations, the Committee suggests that transferring youthful offenders who commit traffic offenses be examined at a later date. See 2007 SENTENCING COMMISSION REPORT, at 8 (so suggesting).

While prior working groups have recommended staggered implementation for 16- and 17-year olds, the Committee recommends implementing the change for both ages at once.

<sup>4</sup> Under the existing provision, the court may transfer jurisdiction over a juvenile who is at least 13 years of age and is alleged to have committed a felony to superior court, where the juvenile will be tried as an adult. G.S. 7B-2200. A motion to transfer may be made by the prosecutor, the juvenile's attorney, or the court. *Id.* If the juvenile is alleged to have committed a Class A felony at age 13 or older, jurisdiction must be transferred to superior court if probable cause is found in juvenile court. *Id.*

<sup>5</sup> Requiring that Class A-E felonies are automatically transferred to superior court is critical to the support of these recommendations by the N.C. Conference of District Attorneys. Automatic transfer to superior court means that the district court judge has no discretion to retain Class A-E felony charges against 16- and 17-year olds in juvenile court. Providing for transfer by indictment meets the prosecutors' interest in being able to avoid requiring fragile victims to testify at a probable cause hearing within days of a violent crime.

The Committee contemplated a statutory exclusion for Class A-E felonies but adopted this approach primarily for two reasons. First, it simplifies detention decisions for law enforcement officers. Under this approach when a juvenile is arrested for any crime, there will be no uncertainty with respect to custody: custody always will be with the Division of Juvenile Justice. To help implement this change, the Division of Juvenile Justice has committed to provide transportation to all juveniles from local jails to juvenile facilities (currently law enforcement is responsible for this transportation). Second, this procedure protects juveniles who are prosecuted in adult court but are found not guilty or their charges are reduced or dismissed, perhaps because of an error in charging. See *State v. Collins*, \_\_ N.C. App. \_\_, \_\_ S.E.2d \_\_ (Feb. 16, 2016) (with respect to three charges, the juvenile improperly was charged as an adult because of a mistake with respect to his age).

<sup>6</sup> This recommendation is designed to ensure that law enforcement officers have sufficient information to exercise discretion when responding to incidents involving juveniles (e.g., whether to release a juvenile or pursue a complaint). Although G.S. 7B-3000(b) already allows the prosecutor to share information obtained from a juvenile's record with law enforcement officers, given the time sensitive nature of officers' field decisions, it is not practical to designate the prosecutor as the officer's source for this information. Because juvenile court counselors are available 24/7, on weekends and on holidays, have access to this information, and are the officer's first point of contact in the juvenile system, they are the best source of time sensitive information for officers.

Consistent with the existing statutory provision that the prosecutor may not allow an officer to photocopy any part of the record, the Committee recommends that the counselor share this information orally only. To preserve confidentiality, if this information is included in a report or record created by the officer, such report or record must be designated and treated as confidential, in the same way that all law enforcement records pertaining to juveniles currently are so designated and treated.

<sup>7</sup> This recommendation is necessary to implement recommendation (2) above.

<sup>8</sup> In response to Committee discussions the Division of Juvenile Justice already has revised the Complainant/Victim Letter used for this purpose and presented the revision to the Committee for feedback.

4. Amending G.S. 7B-1704 to provide that the victim has a right to seek review by the prosecutor of a juvenile court counselor's decision not to approve the filing of a petition.<sup>9</sup>
5. Improving computer systems to give the prosecutor and the juvenile's attorney electronic access to an individual's juvenile delinquency record statewide.<sup>10</sup>
6. Full funding to implement the recommended changes.<sup>11</sup>

*This last contingency bears special emphasis: The stakeholders are unanimous in the view that full funding must be provided to implement these recommendations and that an unfunded or partially unfunded mandate to raise the age will be detrimental to the court system and community safety.*

To ameliorate implementation costs to the juvenile justice system associated with raise the age legislation, the Committee recommends that North Carolina expand state-wide existing programs to reduce school-based referrals to the juvenile justice system.<sup>12</sup>

Finally the Committee recommends requiring regular juvenile justice training for sworn law enforcement officers and forming a limited term standing committee of juvenile justice stakeholders to review implementation of these recommendations and make additional recommendations if needed.<sup>13</sup>

## **A Brief Comparison of Juvenile & Criminal Proceedings**

When there is probable cause that a North Carolina youthful offender has committed a crime, that person is charged like any adult. If not released before trial, the youthful offender is detained in the local jail and at risk of being victimized by sexual violence.<sup>14</sup> The youthful offender is tried in adult criminal court and if found guilty, is convicted of a crime. Although a minor's parent or guardian

<sup>9</sup> G.S. 7B-1704 currently provides this right only to the complainant. To implement this recommendation, conforming changes would need to be made to G.S. 7B-1705 (prosecutor's review of counselor's determination).

<sup>10</sup> G.S. 7B-3000(b) already provides that the prosecutor and the juvenile's attorney may examine the juvenile's record and obtain copies of written parts of the juvenile record without a court order. Section 12 of the Rules of Recordkeeping defines that record as the case file (the file folder containing all paper documents) and the electronic data. Currently the electronic data is maintained in the JWisE computer system, an electronic index of the juvenile record. Without access to this computer system, prosecutors encounter logistical hurdles to accessing the juvenile record to inform decisions regarding charging, plea negotiations, etc. Allowing prosecutors access to the relevant computer system removes these impediments. The prosecutor's access to computer system information should be limited to juvenile delinquency information and may not include other protected information contained in that system, such as that pertaining to abuse neglect and dependency or termination of parental rights. Additionally, the JWisE system currently allows only for county-by-county searches; it does not allow for a statewide search. Given the mobility of North Carolina's citizens, there is a need for statewide searches. To allow for meaningful access to a juvenile's delinquency record, the computer system must be improved to allow for statewide searching.

To ensure parity of access, if the prosecutor is given access to the juvenile record in the relevant computer system, the same access must be given to the juvenile's attorney. As with prosecutors, 7B-3000 already allows the attorney to have access to the record without a court order; but as with the prosecutor, lack of access to the computer system makes this logistically impossible.

Existing law prohibiting photocopying any part of the juvenile record, G.S. 7B-3000(c), would be maintained and apply to computer system records.

<sup>11</sup> Two separate studies have examined the costs of raise the age legislation. See *infra* pages \_\_ - \_\_ (discussing studies).

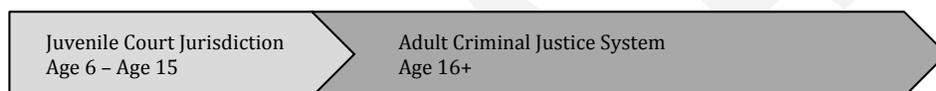

<sup>12</sup> See *infra* pages \_\_ - \_\_ (discussing such programs).

<sup>13</sup> The Standing Committee should include, among others: a district court judge; a superior court judge; a prosecutor who handles juvenile matters; a victims' advocate; and representatives from the law enforcement community, the Division of Juvenile Justice, and the Office of the Juvenile Defender.

<sup>14</sup> A report for the John Locke Foundation supporting raising the juvenile age notes: "one national survey of jails found that in one year, minors were the victims of inmate-on-inmate sexual violence 21 percent of the time, even though they only made up less than one percent of jail inmates." MARK LEVIN & JEANETTE MOLL, JOHN LOCKE FOUNDATION, *IMPROVING JUVENILE JUSTICE: FINDING MORE EFFECTIVE OPTIONS FOR NORTH CAROLINA'S YOUNG OFFENDERS 5* (2013) [hereinafter JOHN LOCKE FOUNDATION REPORT], <http://www.johnlocke.org/acrobat/spotlights/YoungOffendersRevised.pdf>.

must be informed when the child is charged or taken into custody,<sup>15</sup> the criminal case proceeds without any additional requirement of notice to the parent or parental involvement. If convicted and sentenced to prison, the youthful offender serves the sentence in an adult prison facility.<sup>16</sup> In prison, youthful offenders are significantly more likely than other inmates to be victimized by physical violence.<sup>17</sup> The criminal proceeding and all records, including the record of arrest and conviction, are available to the public, even if the youthful offender is found not guilty. All collateral consequences that apply to adult defendants apply to youthful offenders. These consequences include, among other things, ineligibility for employment, professional licensure, public education, college financial aid, and public housing.<sup>18</sup>

**Fig. 1.** Current age of legal jurisdiction.

By contrast, when a person under 16 years old is believed to have committed acts that would constitute a crime if committed by an adult, a complaint is filed in the juvenile justice system alleging the juvenile to be delinquent.<sup>19</sup> A juvenile court counselor conducts a preliminary review of the complaint to determine, in part, whether it states facts that constitute a delinquent offense;<sup>20</sup> essentially this determination looks at whether the elements of a crime have been alleged. If the juvenile court has no jurisdiction over the matter or if the complaint is frivolous, the juvenile court counselor must refuse to file the complaint as a petition.<sup>21</sup> Once the juvenile court counselor determines that the complaint is legally sufficient, he or she decides whether it should be filed as a petition, diverted, or resolved without further action.<sup>22</sup> This evaluation can involve interviews with the complainant and victim and the juvenile and his or her parents.<sup>23</sup> “Non-divertable” offenses, however, are not subject to this inquiry; the juvenile court counselor must approve as a petition a complaint alleging a non-divertable offense once legal sufficiency is established.<sup>24</sup> Non-divertable offenses include murder, rape, sexual offense, and other serious offenses designated by the statute.<sup>25</sup> For all other offenses, the case may be diverted with the stipulation that the juvenile and his or her family comply with requirements agreed upon in a diversion plan or contract, such as participation in mediation, counseling, or teen court.<sup>26</sup> The diversion plan or contract can be in effect for up to six months, during which time the court counselor conducts periodic reviews to

<sup>15</sup> G.S. 15A-505(a).

<sup>16</sup> Male youthful offenders are incarcerated at the Foothills Correctional Institution, an 858-capacity facility for males aged 18-25 years old. See N.C. Dep’t Pub. Safety, Foothills Correctional Institution, N.C. DPS, <https://www.ncdps.gov/Adult-Corrections/Prisons/Prison-Facilities/Foothills-Correctional-Institution> (last modified Mar. 19, 2013). Female youthful offenders serve their sentences at the N.C. Correctional Institution for Women, a facility housing the largest inmate population in the state and female inmates of all ages and all custody and control statuses, including death row, maximum, close, medium, minimum and safekeepers. See N.C. Dep’t Pub. Safety, NC Correctional Institution for Women, N.C. DPS, <https://www.ncdps.gov/Adult-Corrections/Prisons/Prison-Facilities/NC-Correctional-Institution-for-Women> (last modified Aug. 6, 2015).

<sup>17</sup> With respect to physical violence, a report for the John Locke Foundation supporting raising the juvenile age notes: “Research has found minors are 50 percent more likely to be physically attacked by a fellow inmate with a weapon of some sort, and twice as likely to be assaulted by staff.” JOHN LOCKE FOUNDATION REPORT, *supra* note \_\_, at 5. As to suicide, that same report notes: “the limited evidence available suggests the risk of suicide may be higher for youths placed in adult prisons.” *Id.*

<sup>18</sup> For a complete catalogue of collateral consequences, see the UNC School of Government’s Collateral Consequences Assessment Tool, a searchable database of the North Carolina collateral consequences of a criminal conviction, available online at <http://ccat.sog.unc.edu/>.

<sup>19</sup> For the procedures for intake, diversion, and juvenile petitions, see G.S. Ch. 7B, Arts. 17 & 18.

<sup>20</sup> G.S. 7B-1701.

<sup>21</sup> *Id.*

<sup>22</sup> G.S. 7B-1702.

<sup>23</sup> *Id.*

<sup>24</sup> G.S. 7B-1701.

<sup>25</sup> *Id.*

<sup>26</sup> G.S. 7B-1706.

ensure compliance by the juvenile and the juvenile's parent, guardian, or custodian.<sup>27</sup> If diversion is unsuccessful, the complaint may be filed as a petition.<sup>28</sup> If successful, the juvenile court counselor may close the case at an appropriate time.<sup>29</sup> The Division of Adult Correction and Juvenile Justice reports that for calendar years 2008-2011, 21% of complaints were diverted and 18% were closed at intake.<sup>30</sup> 76% of those diverted did not acquire new juvenile complaints within two years.<sup>31</sup> If the counselor approves a complaint as a petition, the case is calendared for juvenile court. If the counselor declines to so approve a complaint, the complainant can request that the prosecutor review that decision.<sup>32</sup> In certain circumstances, such as where the juvenile presents a danger to the community, a district court judge may order that the juvenile be taken into secure custody.<sup>33</sup>

For cases that go to court, the child's parent, guardian, or custodian is made a party to the proceeding and is required to attend court hearings.<sup>34</sup> If the child is adjudicated delinquent, a dispositional hearing is held after which the judge enters a disposition that provides "appropriate consequences, treatment, training, and rehabilitation to assist the juvenile toward becoming a nonoffending, responsible, and productive member of the community."<sup>35</sup> Interventions that can be imposed on delinquent youth array on a continuum. Lower level sanctions include things like restitution, community service, and supervised day programs.<sup>36</sup> Intermediate sanctions include things like placement in a residential treatment facility and house arrest.<sup>37</sup> In certain circumstances, the judge's dispositional order may require the child to be committed into State custody, in which case the child will be held in a youth development center (YDC), housing only those adjudicated as juveniles.<sup>38</sup> Upon commitment to and placement in a YDC, the juvenile undergoes a "screening and assessment of developmental, educational, medical, neurocognitive, mental health, psychosocial and relationship strengths and needs."<sup>39</sup> This and other information is used to develop an individualized service plan "outlining commitment services, including plans for education, mental health services, medical services and treatment programming as indicated."<sup>40</sup> A service planning team meets at least monthly to monitor the juvenile's progress.<sup>41</sup> In contrast to the adult prison setting and because YDCs deal exclusively with juvenile populations, all of their programming is age- and developmentally-appropriate for juveniles. Because of the focus on rehabilitation, and in contrast to a judge's authority in the criminal system, the juvenile dispositional order can require action by the child's parent, guardian, or custodian, such as attending parental responsibility classes,<sup>42</sup> or participation in the child's psychological treatment.<sup>43</sup> Because the juvenile record is confidential and not part of the public record,<sup>44</sup> barriers to employment, education, college financial

aid, and other collateral consequences associated with a criminal conviction do not attach to the same extent.

### **North Carolina Stands Alone Nationwide in its Treatment of Youthful Offenders**

Forty-one states plus the District of Columbia set the age of criminal responsibility at age 18.<sup>45</sup> In these jurisdictions, 16- and 17-year olds are tried in the juvenile justice system, not the adult system. Seven states set the age of criminal responsibility at age 17.<sup>46</sup> This leaves North Carolina and one other state — New York — as the only jurisdictions that prosecute both 16- and 17-year olds in adult criminal court.<sup>47</sup> New York's procedure, however, is much more flexible than North Carolina's in that it has a reverse waiver provision allowing a youthful offender to petition the court to be tried as a juvenile.<sup>48</sup> While other states have moved<sup>49</sup> — and continue to move<sup>50</sup> — to increase juvenile age, North Carolina has not followed suit.

### **Most North Carolina Youthful Offenders Commit Misdemeanors & Non-Violent Felonies**

Consistent with data from other states, stable data shows that only a small number of North Carolina's 16- and 17-year-olds are convicted of violent felonies.<sup>51</sup> Of the 5,689 16-and 17-year olds convicted in 2014,<sup>52</sup> only 187 — 3.3% of the total — were convicted of violent felonies (Class A-E).<sup>53</sup> The vast majority of these youthful offenders — 80.4% — were convicted of misdemeanors.<sup>54</sup> The remaining 16.3% were convicted of non-violent felonies.<sup>55</sup>

The fact that such a small percentage of youthful offenders commit violent felonies caused Newt Gingrich to argue, in support of raising the age in New York, that “[i]t is commonsense to design the system around what is appropriate for the majority, while providing exceptions for the most serious cases.”<sup>56</sup> Likewise, a report on raising the age prepared by the John Locke Foundation notes, “[w]hile there are a small number of very serious juvenile offenders who should be tried as adults due to the nature of their crimes, in the aggregate, the limited available evidence ... suggests that placing all 16 year-olds in the adult criminal justice system is not the most effective strategy for deterring crime or successfully rehabilitating and protecting these youngsters.”<sup>57</sup> Consistent with

these arguments, the Committee recommends a policy that is appropriate for the majority of youthful offenders, with two safeguards for ensuring community safety with respect to the minority of youthful offenders who commit violent crimes: (1) requiring that youthful offenders charged with Class A through E felonies be tried in adult criminal court and (2) maintaining the existing procedure that allows other cases to be transferred to adult court when appropriate.<sup>58</sup>

### **Raising the Age Will Make North Carolina Safer**

As noted in the John Locke Foundation report supporting raising the juvenile age in North Carolina, “[r]esearch consistently shows that rehabilitation of juveniles is more effectively obtained in juvenile justice systems and juvenile facilities, as measured by recidivism rates.”<sup>59</sup> Recidivism refers to an individual’s relapse into criminal behavior, after having experienced intervention for a previous crime,<sup>60</sup> such as a conviction and prison sentence. Lower rates of recidivism means less crime and safer communities. Both North Carolina and national data suggest that prosecuting youthful offenders as adults results in higher rates of recidivism than when youthful offenders are treated in the juvenile system. Thus, raising the age is likely to result in lower recidivism, less crime, and increased safety.

North Carolina data shows a significant 7.5% decrease in recidivism when teens are adjudicated in the juvenile versus the adult system.<sup>61</sup> Experts suggest that youthful offenders have a higher recidivism rate when prosecuted in the adult criminal system because, unlike the juvenile system, the criminal system lacks the ability to implement the most targeted, juvenile-specific, effective interventions for rehabilitation within a framework of parental and community involvement to include mental health, education, and social services participation in the continuum of care.<sup>62</sup> North Carolina data also shows that when youthful offenders are prosecuted in the adult system, they recidivate at a rate that is 12.6% higher than the overall population.<sup>63</sup> Also, individuals with deeper involvement in the criminal justice system generally recidivate at higher rates than those with less involvement (for example, a sentence of probation versus one of imprisonment).<sup>64</sup> Contrary to the conventional rule, in North Carolina youthful offenders who receive probation recidivate at a higher rate than defendants who are released after a prison sentence.<sup>65</sup> These last two data points indicate that North Carolina’s treatment of youthful offenders is inconsistent with reducing crime and promoting community safety. Overall, North Carolina data is consistent with data nationwide: recidivism rates are higher when juveniles are prosecuted in adult criminal court.<sup>66</sup>

---

<sup>58</sup> See *supra* pages \_\_\_ (specifying these recommendations); see generally JOHN LOCKE FOUNDATION REPORT, *supra* note \_\_, at 2 (arguing: “As long as there are mechanisms in place which permit juvenile offenders whose crimes are individually deemed serious enough to be tried as adults, considerations of public safety and the wellbeing of state wards suggest North Carolina should seriously look at joining nearly all other states in making the juvenile justice system the default destination for 16 year-olds.”).

<sup>65</sup> COMPARATIVE STATISTICAL PROFILE, *supra* note \_\_, at Table 9 (showing that while recidivism for overall prison releases is 48.6%, recidivism rates for youthful offenders sentenced to probation is 49.3%).

<sup>66</sup> As noted by Newt Gingrich when arguing in favor of raise the age legislation in New York:

*Research shows that prosecuting youths as adults increases the chances that they will commit more serious crimes. A Columbia University study compared minors arrested in New Jersey (where the age of adulthood is 18) with those in New York. New York teens were more likely to be rearrested than those processed in New Jersey’s juvenile court for*

Additionally, evidence shows that youth receive more supervision in the juvenile system than the adult system. Because they typically present in the adult system with low-level offenses, charges against youthful offenders often are dismissed.<sup>67</sup> Even when youthful offenders are convicted, because they typically have little or no prior criminal record,<sup>68</sup> sentences are often light.<sup>69</sup> As Newt Gingrich observed when supporting raise the age legislation in New York, “because most minors are charged with low-level offenses, the adult system often imposes no punishment whatsoever, teaching a dangerous lesson: You won’t be held accountable for breaking the law.”<sup>70</sup>

Some assert that prosecuting youthful offenders in criminal court has an important deterrent effect. However, as noted in a John Locke Foundation report supporting raising the age in North Carolina, studies show that prosecuting juveniles in adult court does not in fact deter crime.<sup>71</sup> That report continues:

The studies all show that, perhaps due to minors’ lack of maturity or less-than-developed frontal cortex, which controls reasoning, legislative efforts to inflict criminal court jurisdiction and punishments upon minors have not deterred crime. Even more than adult offenders, the very problem with juvenile offenders is that too often they do not think carefully before committing their misdeeds, and they rarely, if ever, review the statutory framework to determine the consequences.<sup>72</sup>

Other researchers agree that adult criminal sanctions do not deter youth crime.<sup>73</sup>

The Committee’s recommendation has built-in protections to deal with violent juveniles: (1) requiring that youthful offenders charged with Class A through E felonies be tried in adult criminal court<sup>74</sup> and (2) maintaining the existing procedure that allows other cases to be transferred to adult court when appropriate.<sup>75</sup> Notably, North Carolina’s existing transfer provision has been used for 13, 14, and 15-year-olds for many years, with no empirical evidence suggesting that violent youth are falling through the cracks.<sup>76</sup>

---

*identical crimes. For violent crimes, rearrests were 39 percent greater. Studies in other states have yielded similar results, leading experts at the Centers for Disease Control to recommend keeping kids out of adult court to combat community violence.*

*Gingrich, supra note \_\_; see also JOHN LOCKE FOUNDATION REPORT, supra note \_\_, at 3-4 (citing several studies that have compared recidivism rates for juvenile offenders tried in juvenile courts with those for juveniles tried in criminal courts); OLA LISOWSKI & MARC LEVIN, MACIVER INSTITUTE & TEXAS PUBLIC POLICY FOUNDATION, 17-YEAR-OLDS IN ADULT COURT: IS THERE A BETTER ALTERNATIVE FOR WISCONSIN’S YOUTH AND TAXPAYERS? 3, 7-9 (2016) (noting that “[i]n Wisconsin, 17-year-olds are three times more likely to return to prison if they originally go through the adult system rather than the juvenile system”; discussing studies in other states, including New York and New Jersey, Florida, and Minnesota) [hereinafter LISOWSKI & LEVIN].*

<sup>67</sup> PowerPoint accompanying Comments of Judge Morey, Committee Meeting Dec. 11, 2015 (noting that in Durham, of the 632 misdemeanors charges taken out on 16- and 17-year-olds in 2012, 495 were dismissed), <http://nccali.org/wp-content/uploads/2015/12/October-2015-Sentencing-Commissions-Research-and-Policy-Study-Group.pdf>.

<sup>68</sup> COMPARATIVE STATISTICAL PROFILE, supra note \_\_, at Table 5 (showing that less than 2% of youthful offenders present with a prior record at level III or above).

<sup>69</sup> *Id.* at Table 7 (showing that almost 75% of youthful offenders receive non-active (community) punishment).

<sup>70</sup> Gingrich, supra note \_\_.

<sup>71</sup> JOHN LOCKE FOUNDATION REPORT, supra note \_\_, at 3 (so noting and discussing data from New York, Idaho, and Georgia calling into question the notion that prosecuting juveniles in adult court has a deterrent effect).

<sup>72</sup> *Id.*

<sup>73</sup> LISOWSKI & LEVIN, supra note \_\_, at 5 (noting that in 1994, after Georgia passed a law restricting access to juvenile court for certain youth, a study showed no significant change in juvenile arrest rates in the years following the statute’s enactment; noting that after New York passed a similar law in 1978, a study found that arrest rates for most offenses remained constant or increased in the time period of the study).

<sup>74</sup> According to the recommendations above, Class A-E felony charges against 16- and 17-year olds will be automatically transferred to superior court after a finding of probable cause or by indictment. See supra p. \_\_ (so specifying)

<sup>75</sup> See supra p. \_\_ (so specifying).

<sup>76</sup> The John Locke Foundation report concluded: “North Carolina [has] a robust system of transfer for felony juvenile offenders, which ensures that the most serious of juvenile offenders can be tried in adult courts even if the age of juvenile court jurisdiction is raised.” JOHN LOCKE FOUNDATION REPORT, supra note \_\_, at 1.

Finally, studies show when states have implemented raise the age legislation, public safety has improved.<sup>77</sup>

### **Raising the Age Will Benefit North Carolina Economically**

Two separate studies authorized by the North Carolina General Assembly indicate that raising the juvenile age will produce significant economic benefits for North Carolina:

1. In 2009, the Governor’s Crime Commission Juvenile Age Study submitted to the General Assembly included a cost-benefit analysis of raising the age of juvenile court jurisdiction to 18. The analysis, done by ESTIS Group, LLC, found that the age change would result in a net benefit to the state of \$7.1 million.<sup>78</sup>
2. In 2011, the Youth Accountability Planning Task Force submitted its final report to the General Assembly. The Task Force’s report included a cost-benefit analysis, done by the Vera Institute of Justice, of prosecuting 16 and 17-year-old misdemeanants and low-level felons in juvenile court. That report estimated net benefits of \$52.3 million.<sup>79</sup>

Much of the estimated cost savings would result from reduced recidivism, which “eliminates future costs associated with youth ‘graduating’ to the adult criminal system, and increased lifetime earnings for youth who will not have the burden of a criminal record.”<sup>80</sup> Cost savings from reduced recidivism has been cited in the national discourse on raising the juvenile age. As noted by Newt Gingrich when arguing in favor of raise the age legislation in New York:

Recidivism is expensive. There are direct losses to victims, the public costs of law enforcement and incarceration and the lost economic contribution of someone not engaged in law-abiding work. When Connecticut raised the age for adult prosecution to 18, crime rates quickly dropped and officials were able to close an adult prison. Researchers calculated the lifetime gain of helping a youth graduate high school and avoid becoming a career criminal or drug user at \$2.5 million to \$3.4 million *for just one person*. An adult record permanently limits youth prospects; it becomes harder to gain acceptance to a good school, get a job or serve in the military. Juvenile records are sealed and provide more opportunity. It’s only fair to give a young person who has paid his debt to society a fresh start. It is in our best interest that youth go on to contribute to the economy, rather than becoming a drain through serial incarceration or dependence on public assistance.<sup>81</sup>

And as noted in a John Locke Foundation report supporting raising the juvenile age, “North Carolina is not merely relying on the projections, but can look to the proven experience of other states.”<sup>82</sup> That report continues: “Some 48 other states from Massachusetts to Mississippi have successfully

<sup>80</sup> LaToya Powell, U.S. Senators Support “Raise the Age”, N.C. CRIM. LAW BLOG (July 14, 2014), <http://nccriminallaw.sog.unc.edu/u-s-senators-support-raise-the-age/>.

<sup>81</sup> Gingrich, *supra* note \_\_.

<sup>82</sup> JOHN LOCKE FOUNDATION REPORT, *supra* note \_\_, at 7.

raised the age and implemented this policy change effectively and without significant complications. Many states, including Connecticut and Illinois, have found that the transition can be accomplished largely by reallocating funds and resources among the adult and juvenile systems.”<sup>83</sup>

The Committee recognizes that its recommendations will require a significant outlay of taxpayer funds, with benefits achieved long-term. However, there are good reasons to believe that costs will be lower than estimated in the analyses noted above. First, the 2011 Vera Institute cost-benefit analysis estimated costs with FY 2007/08 juvenile arrest data. However, as shown in Figure 2 below, juvenile arrest rates have decreased dramatically from 2008.<sup>84</sup>

**Fig. 2.** Falling arrest rates for juveniles under age 18.

	Violent Crime	Property Crime
2008	2,597	13,307
2014	1,537	7,919

Source: North Carolina State Bureau of Investigation, *Crime in North Carolina – 2014*, 7 (Nov. 2015).

These declining arrest numbers for all persons under 18 years old suggest that system costs may be lower than those estimated based on FY 2007/08 data.<sup>85</sup>

Additionally, no prior cost analysis on the juvenile age issue has accounted for cost reductions associated with statewide implementation of pilot programs that reduce admissions into the juvenile system, as recommended by the Committee.<sup>86</sup> For these reasons North Carolina may experience actual costs that are less than those that have been predicted. This in fact would be consistent with the experiences of other states that have raised the juvenile age.<sup>87</sup>

Finally, prior examination of fiscal impact may not have sufficiently taken into account current standards linked to the federal Prison Rape Elimination Act (PREA) that “are likely to raise costs in the adult justice system as county jails and state prisons spend more in areas such as staffing, programming, and facilities.”<sup>88</sup> Thus, “[e]ven the apparent short-term cost advantages of the adult justice system will diminish.”<sup>89</sup> With respect to staffing costs, male 16- and 17-year-old criminal defendants are housed at Foothills Correctional Center; females at North Carolina Correctional Institution for Women.<sup>90</sup> The Division of Juvenile Justice reports that Foothills currently houses 65 juveniles; the Institution for Women houses three. In order to comply with the sight and sound segregation requirements of PREA, every time juveniles are moved within those adult facilities, the facilities must be in lock down, with obvious staffing costs.

<sup>83</sup> *Id.* (providing detail on the experience in Connecticut and Illinois).

<sup>84</sup> North Carolina State Bureau of Investigation, *Crime in North Carolina - 2014*, 7 (Nov. 2015) [hereinafter *NC SBI Crime Report*], [http://crimereporting.ncsbi.gov/public/2014/ASR/2014 Annual Summary.pdf](http://crimereporting.ncsbi.gov/public/2014/ASR/2014%20Annual%20Summary.pdf).

<sup>85</sup> A 2013 fiscal note prepared in connection with HB 725 used data from FY 2012/13. Juvenile arrest rates likewise have declined since 2012: In 2012, 1,556 juveniles under 18 were arrested for violent crimes; that number dropped to 1,537 in 2014. *NC SBI Crime Report*, *supra* note \_\_. In 2012, 9,539 juveniles under 18 were arrested for property crimes; that number dropped to 7,919 in 2014. *Id.*

## Raising the Age Has Been Successfully Implemented in Other States

Other states have enacted raise the age legislation, over vigorous objections that doing so would negatively affect public safety, create staggering caseloads and overcrowded detention facilities, and result in unmanageable fiscal costs.<sup>91</sup> As it turns out, none of the predicted negative consequences have come to pass. For example, in 2009 Illinois moved 17-year-olds charged with misdemeanors from the adult to the juvenile system.<sup>92</sup> Among other things, Illinois reported:

- The juvenile system did not “crash.”
- Public safety did not suffer.
- County juvenile detention centers and state juvenile incarceration facilities were not overrun. In fact, three facilities were closed and the state reported excess capacity statewide.<sup>93</sup>

The Illinois experience was so positive that in July 2013, that state expanded its raise the age legislation to include all 17-year-olds in the juvenile justice system, including those charged with felonies.<sup>94</sup>

Connecticut’s experience was similarly positive. In 2007, Connecticut enacted legislation to raise the age of juvenile jurisdiction from 16 to 18, effective 2010 for 16-year-olds and 2012 for 17-year olds.<sup>95</sup> After the change, juvenile caseloads grew at a lower-than-expected rate and the state spent nearly \$12 million less than budgeted in the two years following the change.<sup>96</sup> A report on Connecticut’s experience gives this bottom line for that state’s experience: “Cost savings and improved public safety.”<sup>97</sup> As has been noted, 48 other states have increased the juvenile age “without significant complications.”<sup>98</sup>

While raise the age efforts have proved to be successful, lower the age campaigns have proved unworkable. In 2007, Rhode Island lowered its juvenile age, pulling 17-year-olds out of the juvenile system and requiring that they be prosecuted as adults.<sup>99</sup> Proponents asserted that the change would save the state \$3.6 million because 17-year-olds would be housed in adult prisons rather than training schools. But the experiment was a failure. As it turned out, youths sentenced to adult prison had to be, for safety reasons, housed in super max custody facilities at the cost of more than \$100,000 per year.<sup>100</sup> Just months later Rhode Island abandoned course and rescinded the law.<sup>101</sup>

## Raising the Age Strengthens Families

Suppose that 16-year-old high school junior Bobby is charged with assault, after a fight at school over a girl. Because North Carolina treats Bobby as an adult, his case can proceed to completion with no parental involvement or input. This led Newt Gingrich to assert, when arguing for raise the age legislation in New York:

[L]aws that undermine the family harm society. When a 16- or 17-year-old is arrested [he or she] ... can be interviewed alone and can even agree to plea bargains without parental consent. What parent would not want the chance to intervene, to set better boundaries or simply be a parent? The current law denies them that right.<sup>102</sup>

While the criminal justice system cuts parents out of the process, the juvenile system requires their participation<sup>103</sup> and thus serves to strengthen parents' influence on their teens.

## Raising the Age Is Supported By Science

Although North Carolina treats its youthful offenders as adults, widely accepted science reveals that adolescent brains are not fully developed.<sup>104</sup> Among other things, research teaches that:

- Interactions between neurobiological systems in the adolescent brain cause teens to engage in greater risk-taking behavior.<sup>105</sup>
- Increases in reward- and sensation-seeking behavior precede the maturation of brain systems that govern self-regulation and impulse control.<sup>106</sup>
- Despite the fact that many adolescents may appear as intelligent as adults, their ability to regulate their behavior is more limited.<sup>107</sup>
- Teens are more responsive to peer influence than adults.<sup>108</sup>
- Relative to adults, adolescents have a lesser capacity to weigh long-term consequences;<sup>109</sup> as they mature into adults, they become more future oriented, with increases in their consideration of future consequences, concern about the future, and ability to plan ahead.<sup>110</sup>
- As compared to adults, adolescents are more sensitive to rewards, especially immediate rewards.<sup>111</sup>

<sup>102</sup> Gingrich, *supra* note \_\_.

<sup>103</sup> See *supra* pages \_\_-\_\_ (noting that parents must participate in proceedings in juvenile court).

<sup>110</sup> Steinberg, *supra* note \_\_, at 469; Comments of Deputy Commissioner Lassiter, Committee Meeting Dec. 11, 2015.

<sup>111</sup> Steinberg, *supra* note \_\_, at 469; Comments of Dr. Cindy Cottle, Committee Meeting Dec. 11, 2015.

- Adolescents are less able than adults to control impulsive behaviors and choices.<sup>112</sup>
- Adolescents are less responsive to the threat of criminal sanctions.<sup>113</sup>

This research and related data has significant implications for justice system policy. First, it suggests that adolescents are less culpable than adults.<sup>114</sup> If the relative immaturity of a 16-year-old’s brain prevents him from controlling his impulses, he is less culpable than an adult who possesses that capability but acts nevertheless.<sup>115</sup> Second, the vast majority of adolescents who commit antisocial acts desist from such activity as they mature into adulthood.<sup>116</sup> Rather than creating a lifetime disability for youthful offenders (e.g., public record of arrest and conviction; ineligibility for employment and college financial aid, etc.), sanctions for delinquent youth should take into account the fact that most juvenile offenders “mature out of crime,”<sup>117</sup> growing up to be law-abiding citizens. Third, response systems that “attend to the lessons of developmental psychology” are more effective in reducing recidivism among adolescents than the punitive criminal justice model.<sup>118</sup> Research shows that active interventions focused on strengthening family support systems and improving abilities in the areas of self-control, academic performance, and job skills are more effective than strictly punitive measures in reducing crime.<sup>119</sup> While these type of interventions can be and are implemented in the juvenile system, they are virtually unavailable in the adult criminal justice system. Finally, because adolescents are particularly susceptible to peer influence, outcomes are likely to be better when individuals in a formative stage of development are placed in an environment with an authoritative parent or guardian and prosocial peers rather than with adult criminals.<sup>120</sup>

### **Raising the Age is Consistent with Supreme Court Decisions Recognizing Juveniles’ Lesser Culpability & Greater Capacity for Rehabilitation**

Raising the juvenile age is consistent with recent decisions by the United States Supreme Court recognizing that juveniles’ unique characteristics require that they be treated differently than adults. First, in *Roper v. Simmons*,<sup>121</sup> the Court held that the Eighth Amendment bars imposing capital punishment on juveniles. Next, in *Graham v. Florida*,<sup>122</sup> it held that same amendment prohibits a sentence of life without the possibility of parole for juveniles who commit non-homicide offenses. Then, in *Miller v. Alabama*,<sup>123</sup> the Court held that mandatory life without parole for those under the age of 18 at the time of their crimes violates the Eighth Amendment. Citing the type of science and social science research discussed in this report,<sup>124</sup> the Court recognized that juvenile offenders are less culpable than adults, have a greater capacity than adults for rehabilitation, and are less responsive than adults to the threat of criminal sanctions.<sup>125</sup> The Court found persuasive

research “showing that only a relatively small proportion of adolescents who engage in illegal activity develop entrenched patterns of problem behavior,”<sup>126</sup> stating:

[Y]outh is more than a chronological fact. It is a time of immaturity, irresponsibility, impetuosity[,] and recklessness. It is a moment and condition of life when a person may be most susceptible to influence and to psychological damage. And its signature qualities are all transient.<sup>127</sup>

And just this year, in *Montgomery v. Louisiana*,<sup>128</sup> the Court took the extraordinary step of holding that the *Miller* rule applied retroactively to cases that became final before it was decided. The *Montgomery* Court recognized that the “vast majority of juvenile offenders” are not permanently incorrigible, and that only the “rarest” of juveniles can be so categorized.<sup>129</sup> The Court again noted that most juvenile crime “reflect[s] the transient immaturity of youth.”<sup>130</sup>

The Court’s reasoning in these cases supports raising the age of juvenile court jurisdiction.

### **Raising the Age Removes a Competitive Disadvantage NC Places on its Youth**

Suppose two candidates apply for a job. Both have the same credentials. Both got into fights at school when they were 16 years old, triggering involvement with the judicial system. But because one of the candidates, Sam, lives in Tennessee, his juvenile delinquency adjudication is confidential and cannot be discovered by his potential employer. The other candidate, Tom, is from North Carolina. Because of that, his interaction with the justice system resulted in a criminal conviction for affray. Tom’s entire criminal record is discovered by his potential employer. Who is more likely to get the job?

As this scenario illustrates, saddling North Carolina’s youth with arrest and conviction records puts them at a competitive disadvantage as compared to youth from other states.<sup>131</sup> Although some have suggested that expunction can be used to remove teens’ criminal records, there are significant barriers to expunction, such as legal fees. One district court judge reported to the Committee that expunctions for youthful offenders represent only a “tiny fraction” of the total convictions.<sup>132</sup> Additionally, even if expunction is available to remove the official criminal record, it does nothing to delete information about a youthful offender’s arrest or conviction as reported on the internet by news outlets, private companies, and social media.

### **Reducing School-Based Referrals Can Mitigate the Costs of Raising the Age**

In North Carolina, school-based complaints account for almost half of the referrals to the juvenile justice system.<sup>133</sup> This phenomenon is asserted to be part of the “school to prison pipeline,” through which children are referred to the court system for classroom misbehavior that a generation ago would have been handled in the schools. Concerns have been raised nationally and in North Carolina that excessive punishment of public school students for routine misbehavior is

counterproductive and out of sync with what science and social science teach about the most effective corrective action.<sup>134</sup> Some have suggested that such referrals unnecessarily burden the juvenile justice system with frivolous complaints.<sup>135</sup>

Responding to these concerns, individuals and groups throughout the nation have developed models to stem the flow of school-based referrals to the court system, instead addressing school misconduct immediately and effectively when and where it happens. In 2004, Juvenile Court Judge Steven Teske of Georgia developed one such model, in which school officials, local law enforcement, and others signed on to a cooperative agreement. The agreement provides, among other things, that “misdemeanor delinquent acts,” like disrupting school and disorderly conduct do not result in the filing of a court complaint unless the student commits a third or subsequent similar offense during the school year, and the principal conducts a review of the student’s behavior plan. Youth first receive warnings and after a second offense, they are referred to mediation or school conflict training programs. Elementary students cannot be referred to law enforcement for “misdemeanor delinquent acts” at all. Teske’s program reports an 83% reduction in school referrals to the justice system.<sup>136</sup> It also reports another significant outcome: a 24% increase in graduation rates.<sup>137</sup> Two other states that have adopted similar programs – commonly referred to as school-justice partnerships – have experienced similar results.<sup>138</sup> In fact, Connecticut has enacted a state law requiring all school systems that use law enforcement officers on campus to create school-justice partnerships.<sup>139</sup>

North Carolina already has one such program in place. Modeled on Teske’s program, Chief District Court Judge J.H. Corpening II, has implemented a school-justice partnership program in Wilmington, North Carolina. Like Teske’s program, the Wilmington program requires that official responses to school-based disciplinary issues conform to what science and social science teaches is effective for juveniles.<sup>140</sup> The program was crafted with participation from local law enforcement, prosecutors, court counselors, the chief public defender, school officials, and community members. The group developed an approach that deals with school discipline in a consistent and positive way through a graduated discipline model.<sup>141</sup> The goal is for the schools to take a greater role in addressing misbehavior when and where it happens, rather than referring minor matters to the court system, with its delayed response. Officials in North Carolina’s Juvenile Justice system view the program as a “huge step forward” with respect to reducing school-based referrals.<sup>142</sup> Because Wilmington’s program is so new, data on its effectiveness is not available. However, based on data from other jurisdictions, statewide implementation of school-justice partnerships based on the Georgia model promises to reduce referrals to the juvenile system and thus mitigate costs associated with raising the juvenile age.

## North Carolina Department of Juvenile Justice Stands Ready to Implement Raise the Age Legislation

Increasing the juvenile age will increase the number of juveniles in the juvenile justice system. Notwithstanding this, the North Carolina Division of Adult Correction and Juvenile Justice supports this recommendation and stands ready to implement raise the age legislation.<sup>143</sup> Speaking to the Committee, Commissioner Guice indicated that he was very supportive of raising the age and emphasized that North Carolina already has done the studies and developed the data on the issue. Additionally, he noted that other states have led the way and their experience with raise the age legislation suggests that “there is no reason why we can’t address this in North Carolina.” In fact, he urged the Committee, not to “back away from doing what is right” on this issue.

## Every North Carolina Study Has Made the Same Recommendation: Raise the Age

In recent history, General Assembly has commissioned two studies of raise the age legislation. Both came to the same conclusion: North Carolina should join the majority of states in the nation and raise the juvenile age. First, in 2007, pursuant to legislation passed by the General Assembly, the North Carolina Sentencing and Policy Advisory Commission submitted its Report on Study of Youthful Offenders recommending, in part, that North Carolina increase the age of juvenile jurisdiction to 18.<sup>144</sup> Second, in 2011, pursuant to legislation passed by the General Assembly, the Youth Accountability Task Force submitted its final report to the General Assembly recommending, among other things, moving youthful offenders to the juvenile justice system.<sup>145</sup> Additionally, in December 2012, the Legislative Research Commission submitted its report to the 2013 General Assembly, supporting a raise the age proposal.<sup>146</sup>

## Broad Bi-Partisan & Unanimous Stakeholder Support to Raise the Age

Bills to raise the juvenile age have been introduced and supported in North Carolina by lawmakers from both sides of the aisle<sup>147</sup> and raise the age proposals and related efforts to remove non-violent juveniles from the adult criminal justice system have enjoyed bipartisan support around the nation.<sup>148</sup>

Avila (R), Moffitt (R), Mobley (D), and D. Hall (D)), <http://www.ncga.state.nc.us/gascripts/BillLookUp/BillLookUp.pl?Session=2013&BillID=h725&submitButton=Go>; AGE OF JUVENILE OFFENDERS COMMITTEE REPORT, *supra* note \_\_, at 12 (supporting S 434 after consideration of identified issues).

<sup>148</sup> See, e.g., Gingrich, *supra* note \_\_. In 2014, U.S. Senators Rand Paul (R-KY) and Cory Booker (D-NJ) introduced the REDEEM (Record Expungement Designed to Enhance Employment) Act, encouraging states to increase the age of criminal responsibility to 18.

## SUPPORT

The recommendations in this report enjoy unanimous support of the following Committee members, Subcommittee on Juvenile Age members, and key stakeholders, including the N.C. Conference of District Attorneys and the law enforcement community:

- Augustus A. Adams, Committee member & member, N.C. Crime Victims Compensation Committee
- Asa Buck III, Committee member, Sheriff Carteret County & Chairman N.C. Sheriffs' Association Executive Committee
- Randy Byrd, Committee member, & President, N.C. Police Benevolent Association
- James E. Coleman Jr., Professor, Duke University School of Law
- Kearns Davis, Committee member & President-Elect, N.C. Bar Association
- W. David Guice, Commissioner, North Carolina Division of Adult Correction and Juvenile Justice
- Paul A. Holcombe, Committee member & N.C. District Court Judge
- Darrin D. Jordan, Committee member, lawyer, & Commissioner, N.C. Indigent Defense Commission
- Robert C. Kemp III, Committee member, Public Defender & President, N.C. Defenders' Association
- William Lassiter, Subcommittee member & Deputy Commissioner for Juvenile Justice
- Sharon S. McLaurin, Committee member, Magistrate & Past-President, N.C. Magistrates' Association
- R. Andrew Murray Jr., Committee member, District Attorney, & President, N.C. Conference of District Attorneys
- Diann Seigle, Committee member & Executive Director, Carolina Dispute Settlement Services
- Anna Mills Wagoner, Committee member & N.C. Senior Resident Superior Court Judge
- William A. Webb, Commission Co-Chair, Committee Chair & Ret. U.S. Magistrate Judge
- James Woodall, Subcommittee member & District Attorney
- Eric J. Zogry, Subcommittee member & Juvenile Defender, N.C. Office of the Juvenile Defender<sup>149</sup>
